Voice Harbor

World's N°1 Audio Data
Governance Platform

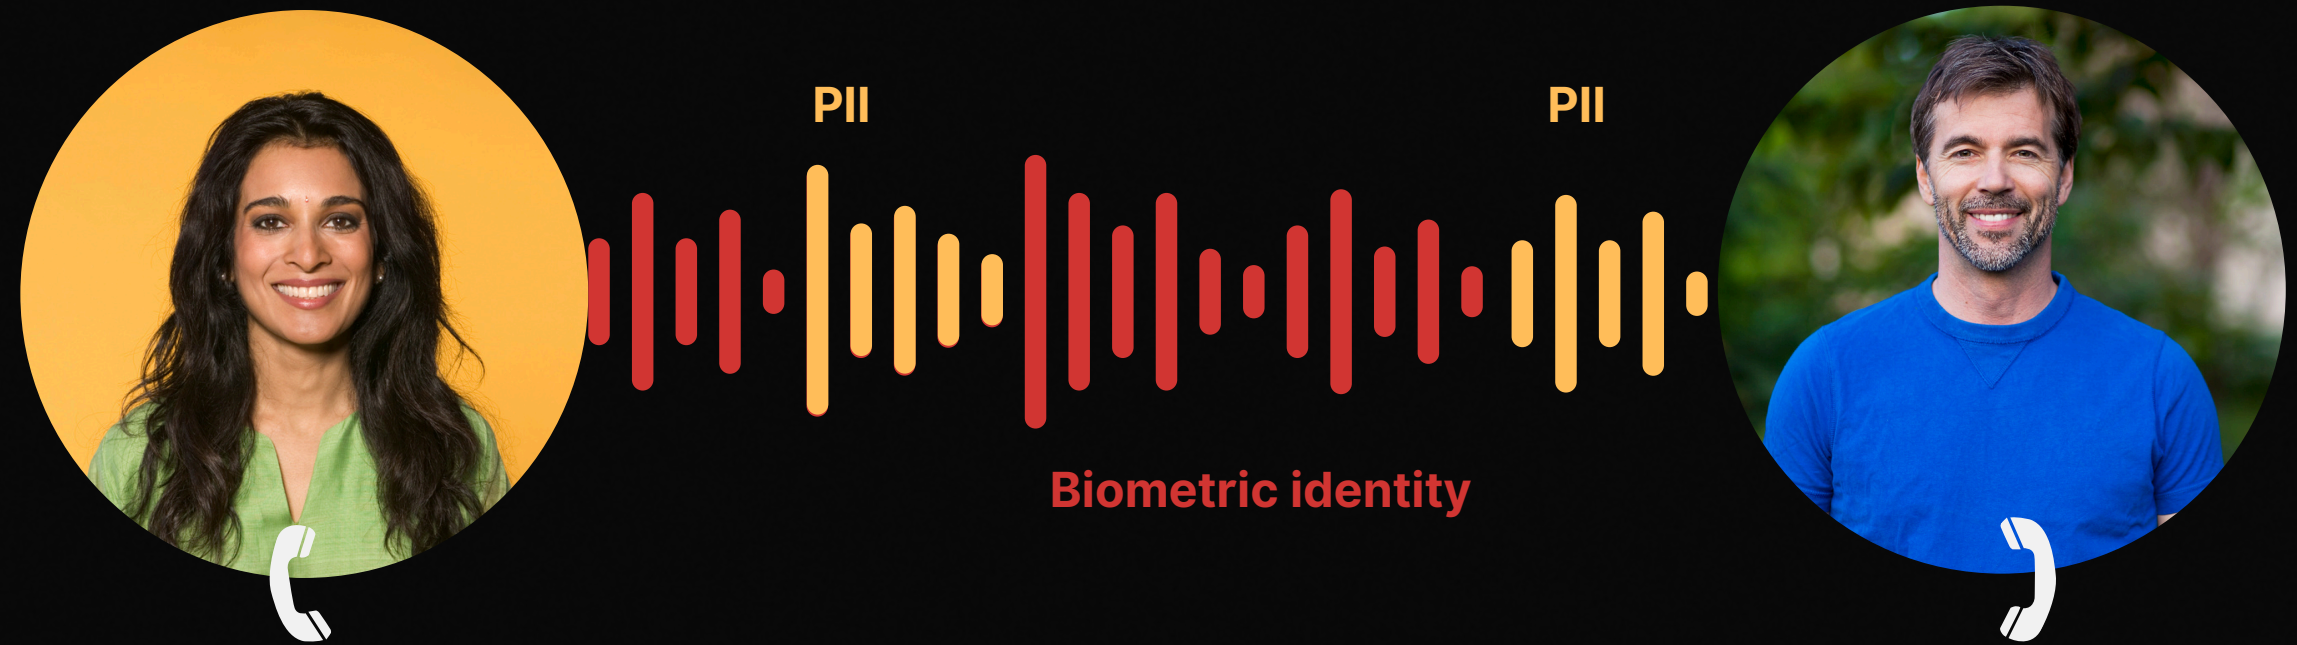

The screenshot displays the Voice Harbor interface. At the top, a green banner indicates "Compliant anonymised audio" with a checkmark and a download icon. Below this is a waveform of an audio file from 0:00 to 0:51. A "Show transcription" dropdown is visible. The main content area shows a list of PII categories detected: Address (1), City (1), Date and Time (1), Health insurance number (1), Medical Condition (1), Medical Conditions (3), and Person (2). Below this, related regulations are listed: CCPA (California), PCI-DSS, HIPAA (USA), GDPR (EU), PIPEDA (Canada), and LGPD (Brazil). A large black "Anonymise" button is positioned at the bottom of the PII detection section. At the very bottom, a "Voice quality" meter shows a range from LOW to HIGH with a bar graph.
