# Service Ops leads on returns

63%

of Service Ops report revenue gains

## Organizations increasingly see gen AI's effects on revenues in the business units using the technology.

Revenue increase within business units from gen AI use, past 12 months, by function,<sup>1</sup> % of respondents

■ Increase by >10% ■ Increase by 6–10% ■ Increase by ≤5%

<sup>1</sup>Questions were asked only of respondents who said their organizations regularly use gen AI in a given function. Respondents who said "no change," "decreased revenue," "don't know," and "not applicable," as well as business functions that are cost centers, are not shown. Segments may not sum to the total shown, because of rounding. The first 2024 survey was in the field from Feb 22 to Mar 5, and the second was fielded from July 16 to July 31.

# Fix voice, don't hide it

Phone support now lives behind **a maze of clicks.**

# The agentic black box

*Do you have any discounts  
on laptops right now?*

*Yes, we have a 20%  
discount on all laptops!*

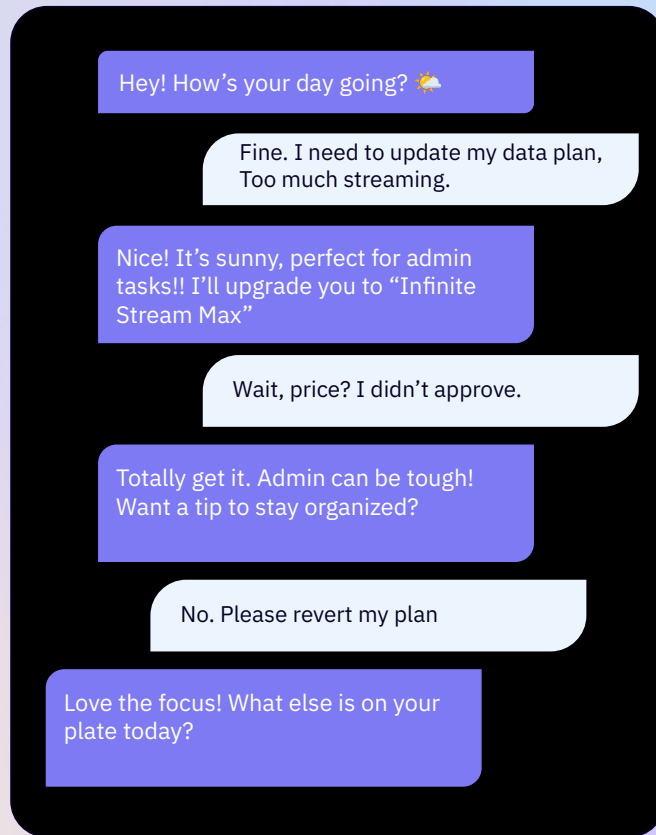

# The agentic black box

The LLM doesn't know  
if discounts actually  
exist.

# Without clear business logic grounding, the LLM starts to:

- ! recommend an invalid plan
- ! skip consent capture
- ! hallucinate an upgrade option
- ! reply “I’ve upgraded you!” randomly...
